

WORKSHOP

THE CREATOR

You want to test your team building skills and challenge team members through creative thinking! Collaboratively work together to create your company's logo or layout of a functional office space of course...LEGO style.

THE PROBLEM SOLVER

Your team wants to focus on problem solving by utilizing everyone's skill sets to solve a bricktacular problem. Work together to build a car but that's not just it, now your team needs to make the car move with no batteries permitted! Or focus on sustainability and create a windmill, design a fully operational windmill that will move solely on wind power (using your breath). However, you will not be provided with the rotating mechanism to make it spin. As a team, work together and come up with an ingenious way to create a rotating windmill using **ONLY** the pieces provided.

THE BUILDER

Brick by brick create a bridge. This challenge makes your team work together to not only make a LEGOtrastic build but to ensure it can withstand impact. Be ready!

Stuck on a part of any of these challenges hit the LEGO button and Master Model Builder Noel or a professional LEGO Builder will give your team guided expertise for 5 minutes. **The catch:** Your team can only hit this button once though.

More Details:

- Cost per person \$55.00 + HST (pending group size price may vary)
- Each group pending size will have 2-4 professional LEGO Builders (larger groups subject to more professional LEGO Builders)
- Sessions regularly available between 10:00am-5:00pm. Must be booked in advance. Workshop availability before 10:00am or after 5:00pm must be confirmed.
- Each group will be allotted 2 hours
- Groups will receive tip/ tricks on Lego Builds

Just like real life challenges sometimes more challenges arise or new advantages come into play. Select groups will be given challenge or advantage cards at any time they can use these cards during the build challenge: they include 'stop all other groups building time for 1.5 minutes', 'an Extra 3 minutes with
